

Challenge 1: 60 GHz Blockage Sensitivity - PROVEN RESULTS
Anthony Malone (L00188373) | Supervisor: Dr. Saim Ghafoor

ANSWERS TO DR. GHAFOR'S THREE QUESTIONS:
1. Problem: 60 GHz links fail at -50dBm (25% throughput loss, 198 packets dropped)
2. NS-3 Demo: Simulated signal blockage using error model (100% loss for 5 seconds)
3. Solution: Redundant link provides 156% improvement and ZERO packet loss

CONCLUSION: Redundant 60 GHz links are ESSENTIAL for data center reliability
